Hooking up C++ with iOS

```cpp
auto getCLIArguments() {
  std::vector<std::string> arguments;
  for (NSString *string in [[NSProcessInfo processInfo] arguments]) {
    arguments.emplace_back([string UTF8String]);
  }
  return arguments;
}
```

C++ Cocoa Touch

Objective C++

Hooking up C++ with iOS

Objective C++

C++ ⟷ **Cocoa Touch**

```
auto getCLIArguments() {
  std::vector<std::string> arguments;
  for (NSString *string in [[NSProcessInfo processInfo] arguments]) {
    arguments.emplace_back([string UTF8String]);
  }
  return arguments;
}
```
